I'm pleased to provide a reference for Roman Primerov, who has been an exceptional DevOps and Full Stack Engineer during the development of our website using AWS services and the Laravel framework. Roman's contributions have been invaluable to the success of our project.

One of Roman's notable achievements was developing a multi-domain website to cater to countries worldwide, utilizing domain zones such as .com, .co.uk, .com.au, and others. This enabled us to target our audience in specific regions and provide a localized user experience.

Roman also demonstrated his expertise in automating critical processes within our e-commerce platform. He successfully implemented automated solutions for shopping cart and order management, product catalog, and product listings, among other essential e-commerce tasks. His efforts significantly improved the efficiency of our online store and enhanced the overall user experience.

Roman was mindful of SEO considerations throughout the development process, ensuring the project adhered to best practices to preserve search engine traffic. Additionally, he prioritized the user experience and incorporated intuitive UX/UI interfaces, making the website user-friendly and easy to navigate.

Roman's technical skills, attention to detail, and dedication to delivering high-quality results were evident throughout our collaboration. His ability to effectively communicate and collaborate with our team was instrumental in the smooth execution of the project.

I highly recommend Roman Primerov for any DevOps or Full Stack Engineering roles. He consistently demonstrated professionalism, problem-solving abilities, and a proactive attitude. Don't hesitate to contact me if you require further information or have any specific inquiries.

Sincerely, *Sergei Cvetkov*
